

CaseRite III version 2.2

New features and changes made to the CaseRite III software from version 2.1. to version 2.2 include the following:

- **Updates NOC** - CaseRite III version 2.2 updates the Notice of Claim with new language relative to penalty provisions and changes the violation table contained in the NOC to specifically identify any violations subject to Section 222. The CaseRite III user identifies violations that are subject to Section 222 from either the **Add Violation** or **Edit Violation** screens in CaseRite III. To identify a violation as subject to Section 222, the user checks the box labeled Section 222 on one of these screens. This will cause a checkmark to be entered in the NOC violation table under the heading § 222 Applied.
- **Provides the option of configuring the NOC Service list to include an FMCSA attorney.**
- **Violation Table Updated** – this table has been updated with a number of new drug and alcohol violations
- **Includes several new abatement and charge introduction templates**
- **Modifies HM charge introduction templates** – the charge introduction templates for hazardous materials violations have been updated to change the reference to interstate commerce to commerce.

Installation Notes:

Installing CaseRite III version 2.2 will overwrite any existing cases contained in a currently installed version of CaseRite III. Therefore, any cases contained in a currently installed version of CaseRite III should be exported to an export file prior to installing CaseRite III version 2.2. After CaseRite III version 2.2 is installed these cases can then be imported into the updated version of CaseRite III.
